

Dr. Su Yan

Department of Electrical Engineering and Computer Science
College of Engineering and Architecture, Howard University

Office: 2300 Sixth Street, NW, Suite 3030C, L. K. Downing Building, Washington, DC 20059
E-mail: su.yan@howard.edu, suyan@ieee.org | Phone: (202) 806-2215 | Website: www.sudoem.com

Education

University of Illinois at Urbana-Champaign

Doctor of Philosophy August 2016

Electrical and Computer Engineering

Dissertation: "Computational Modeling and Simulation of Nonlinear Electromagnetic and Multi-physics Problems"

GPA: 3.97/4.00

Master of Science August 2012

Electrical and Computer Engineering

Thesis: "Accuracy Improvement of the Second-Kind Fredholm Integral Equations in Computational Electromagnetics"

GPA: 4.00/4.00

University of Electronic Science and Technology of China

Doctor of Philosophy December 2011

Electromagnetics and Microwave Technology

Dissertation: "Calderón Technique Based Integral Equation Methods in Computational Electromagnetics"

GPA: 3.86/4.00

Bachelor of Science July 2005

Electronic Information Engineering

Thesis: "Analysis of the Near Singularity and Singular Currents in the Simulation of Electromagnetic Scattering Problems"

GPA: 3.75/4.00

Experience

Howard University

Washington, DC

Assistant Professor

August 2018–present

Department of Electrical Engineering and Computer Science

Director of Graduate Studies, Electrical Engineering

June 2020–present

Department of Electrical Engineering and Computer Science

University of Illinois at Urbana-Champaign

Urbana, IL

Postdoctoral Research Associate

August 2016–July 2018

Department of Electrical and Computer Engineering

Instructor <i>Department of Electrical and Computer Engineering</i> UIUC List of Teachers Ranked as Excellent by Their Students, Outstanding Rating (top 10%)	August 2012–December 2012, August 2016–May 2018
Graduate Research Assistant <i>Department of Electrical and Computer Engineering</i>	August 2011–July 2012, January 2013–July 2016
Graduate Teaching Assistant <i>Department of Electrical and Computer Engineering</i>	August 2013–May 2014
Visiting Scholar <i>Department of Electrical and Computer Engineering</i>	September 2008–July 2011

*Schlumberger**Sugar Land, TX*

Modeling & Simulation Engineer Intern
Houston Formation Evaluation Integration Center (HFE)

June 2014–August 2014

Teaching

Howard University

Assistant Professor	Fall 2018 – present
EECE 260 – <i>Engineering Programming and Application</i>	Undergraduate course, 3 hours
EECE 305 – <i>Fundamentals of Electromagnetics</i>	Undergraduate course, 4 hours
EECE 306 – <i>Fundamentals of Electromagnetics Laboratory</i>	Undergraduate course, 1 hour
EECE 310 – <i>Principles of Electronics</i>	Undergraduate course, 2 hours
EECE 466 – <i>Advanced Electromagnetic Theory</i>	Undergraduate course, 3 hours
EECE 501 – <i>Graduate Seminar</i>	Graduate course, 0 hour
EECE 520 – <i>Electromagnetic Theory</i>	Graduate course, 3 hours
EECE 629 – <i>Numerical Tech for Electromagnetics</i>	Graduate course, 3 hours
EECE 695 – <i>Special Topics in Microwaves</i>	Graduate course, 3 hours

University of Illinois at Urbana-Champaign

Instructor	Fall 2012, 2016 – 2018
ECE 210 – <i>Analog Signal Processing</i>	Undergraduate course, 4 hours
ECE 211 – <i>Analog Circuits & Systems</i>	Undergraduate course, 2 hours
ECE 520 – <i>Electromagnetic Waves & Radiating Systems</i>	Graduate course, 4 hours
UIUC List of Teachers Ranked as Excellent by Their Students, Outstanding Rating (top 10%)	
Graduate Teaching Assistant	Fall 2013, Spring 2014
ECE 385 – <i>Digital Systems Laboratory</i>	Undergraduate course, 2 hours
ECE 540 – <i>Computational Electromagnetics</i>	Graduate course, 4 hours

Research Interests & Experiences

Current research interests include all aspects of electromagnetics and multiphysics modeling and simulation methods, high-performance and cloud computing technologies, and machine learning methods, with particular interests and related experiences in the following areas:

1 Electromagnetic Modeling & Simulation Methods

- a Linear and nonlinear electromagnetic modeling and simulation;
- b Forward and inverse problems;
- c Frequency- and time-domain algorithms;
- d Integral-equation- and partial-differential-equation-based methods;
- e Fast algorithms and preconditioning techniques.

2 Multiphysics Modeling & Simulation Methods

- a Electrical–thermal and magnetic–thermal coupling and co-simulation methods;
- b Electromagnetic–particle coupling and co-simulation methods;
- c Spatial and temporal multiscale problems and coupling schemes.

3 Advanced High-Performance Computing Methods

- a High throughput algorithm design;
- b Dynamically h -, p -, and hp -adaptive algorithms in the time domain;
- c Domain decomposition methods and multi-solver schemes;
- d Large-scale parallel computing techniques based on both CPU and GPU platforms.

4 High-Scalability Computing Methods for Cloud Architectures

- a High-scalability method development for cloud computing;
- b Fast parameter sweep methods;
- c Optimization methods: gradient-based and Newton methods for design optimization.

5 High-Performance and High-Scalability Computing for Engineering Applications

- a Electromagnetic radiation, propagation, and scattering: antenna and array analysis, radar cross section (RCS) evaluation;
- b Electromagnetic compatibility (EMC) and electromagnetic interference (EMI) analysis;
- c Microwave, nano- and electronic devices and circuits modeling and analysis;
- d High-speed electrical machine modeling: magnetic loss and hysteresis analysis, magnetic–thermal–structural co-simulation;
- e Bio-electromagnetic problems: specific absorption rate (SAR) modeling and evaluation, analysis of electromagnetic–thermal effects.

6 Machine Learning for Design Optimization

- a Reinforcement learning for antenna array thinning and optimization;
- b Deep learning for microwave filter and circuit design;
- c Electromagnetic inverse problems: microwave and optical imaging, well-logging technologies in oil and gas exploration.

Research Projects

Howard University

1. Excellence in Research: Microwave-Assisted In-Situ Hydrogen Generation: Experimentation, Simulation, and Optimization, National Science Foundation, 6/1/2023 – 5/31/2026, PI, Pending.
2. Establishing a Vertically Integrated Partnership with Howard University through Planetary and Exoplanetary Sciences, NASA JPL, 10/2022 – 9/2024, University Lead, Awarded.
3. CAREER: Neural Network Enhanced Electromagnetics and Multiphysics Simulation Methods for RF and Microwave Reconfigurable Devices, National Science Foundation, 6/1/2023 – 5/31/2028, PI, Awarded.

4. Excellence in Research: Artificial Intelligence Aided Metasurface Design and Application in Next Generation of Cellular Communication Systems, National Science Foundation, 9/1/2022 – 8/31/2025, Co-PI, Awarded.
5. Multiphysics and Multiscale Simulation Methods for Electromagnetic Energy Assisted Fossil Fuel to Hydrogen Conversion, Department of Energy, 9/1/2021 – 8/31/2024, PI, Awarded.
6. Research Initiation Awards: Theoretical and Computational Methods for the Robust Retrieval of Effective Electromagnetic Properties of Random Composite Materials, National Science Foundation, 6/1/2021 – 5/31/2024, PI, Awarded.
7. A Novel Numerical Method for Electronic Circuit Modeling, Howard University, 5/19/2020 – 9/25/2020, PI, Awarded.
8. A Novel Approach to Coronagraph Design for ExoEarth Observations, NASA JPL, 1/30/2020 – 9/27/2020, Co-PI, Awarded.
9. Advanced Computational Methods for Electromagnetic-Based Multiphysics and Multiscale Problems, Howard University, 5/16/2019 – 8/15/2019, PI, Awarded.

Society Membership

Senior Member	2017–present
Institute of Electrical and Electronics Engineers (IEEE)	
IEEE Antennas and Propagation (AP) Society	
IEEE Microwave Theory and Techniques (MTT) Society	
Life Member	2011–present
Applied Computational Electromagnetics Society (ACES)	
Member	2012–2016
Institute of Electrical and Electronics Engineers (IEEE)	
IEEE Antennas and Propagation (AP) Society	
Student Member	2008–2011
Institute of Electrical and Electronics Engineers (IEEE)	
IEEE Antennas and Propagation (AP) Society	

Honors, Awards, & Fellowships

1. NSF Early CAREER Award, National Science Foundation, 2023
2. Edward E. Altschuler AP-S Magazine Prize Paper Award, IEEE Antennas and Propagation Society, 2020
3. Faculty Scholar, Junior Faculty Writing and Creative Works Summer Academy, Howard University, 2020
4. ACES Early Career Award, "For contributions to linear and nonlinear electromagnetic and multiphysics modeling and simulation methods." Applied Computational Electromagnetics Society (ACES), 2020
5. Summer Faculty Research Fellowship, Howard University, 2019
6. Outstanding Reviewer, Journal of Computational Physics, November, 2018
7. Best Student Paper Award, The First Place Winner, ACES, Honolulu, HI, 2016
8. USNC/URSI Travel Fellowship Grant Award, The National Academies (NAS), 2015

9. P. D. Coleman Outstanding Research Award, Department of Electrical and Computer Engineering, University of Illinois at Urbana-Champaign, 2015
10. Yuen T. Lo Outstanding Research Award, Department of Electrical and Computer Engineering, University of Illinois at Urbana-Champaign, 2014
11. Outstanding Doctoral Dissertation, Sichuan Provincial People's Government, 2014
12. UIUC List of Teachers Ranked as Excellent by Their Students, Outstanding Rating (top 10%), University of Illinois at Urbana-Champaign, Fall 2012
13. Outstanding Graduate Student (Highest honor from the university, ten recipients annually), UESTC, 2011
14. Best Student Paper Award, The First Place Winner, ACES, Williamsburg, VA, 2011
15. Best Student Paper Award, IEEE Chengdu Section, 2010
16. Distinguished Dissertation Award, UESTC, 2005
17. China Aerospace Science and Technology Corporation (CASC) Scholarship, CASC, 2011
18. Scholarship for Graduates, UESTC, The Top Grade, 2006; The 2nd Grade, 2008 and 2009; and The 3rd Grade, 2010
19. People's Scholarship for Undergraduates, UESTC, The 3rd Grade, 2002; The 2nd Grade, 2003 and 2004; and The 1st Grade, 2005
20. National Mathematical Modeling Competition, The 3rd Award, Sichuan, China, 2003
21. Mathematical Modeling Competition, The 3rd Award, UESTC, 2002

Professional Activities

Academic Community Service

Member of IEEE Senior Member Review Panel, IEEE, 2022–present

Member of AP-S Meetings Committee, IEEE Antennas and Propagation Society (AP-S), 2022.

Chair, Website and Publications Subcommittee

Member, Conference Sponsorship Review Subcommittee

Journal Editorship

Academic Editor, *PeerJ Computer Science*, 2020–present.

Associate Editor, *IEEE Access*, 2019–present.

Associate Editor & Editorial Board Member, *International Journal of Numerical Modelling: Electronic Networks, Devices and Fields*, 2019–present.

Associate Editor & Editorial Board Member, *Advances in Mathematical Physics*, 2018–present.

Guest Editor of a special issue “Challenges and Endeavors of Over-the-Air (OTA) and Electromagnetic Compatibility (EMC) Tests for 5G Radios” for *IEEE Access*, scheduled, 2021.

Guest Editor of a special issue “Multiscale Modeling and Simulation Methods for Electromagnetic and Multiphysics Problems” for *International Journal of Numerical Modelling: Electronic Networks, Devices and Fields*, published, October, 2021.

Lead Guest Editor of a special issue “Advanced Modeling and Simulation Methods for Multiphysics and Multiscale Problems” for *International Journal of Antennas and Propagation*, published, August 18, 2017. (Call for papers can be found [here](#).)

Conference Committees

Member of Organizing Committee, Special Session Chair, 2022 International Applied Computational Electromagnetics Society (ACES-China) Symposium, Xuzhou, China, July 28–31, 2022.

Member of Steering Committee, Publicity Chair, and Member of Technical Program Committee, IEEE International Symposium on Antennas and Propagation and USNC-URSI Radio Science Meeting, Denver, CO, USA, July 10–15, 2022.

Member of Steering Committee, Technical Program Committee Co-Chair, 2021 International Applied Computational Electromagnetics Society (ACES-USA) Symposium, Online meeting due to pandemic, August 1–5, 2021.

Member of Organizing Committee, Student Paper Competition Chair, 2021 International Applied Computational Electromagnetics Society (ACES-China) Symposium, Chengdu, China, July 28–31, 2021.

Member of Technical Program Committee, Symposium on Recent Advances in Communication Theory, Information Theory, Antennas and Propagation (CIAP'20), Chennai, India, October 14–17, 2020.

Special Session Organizer and Chair, 2020 International Applied Computational Electromagnetics Society (ACES) Symposium, Monterey, CA, USA, March 22–26, 2020.

Special Session Organizer and Chair, IEEE International Conference on Computational Electromagnetics (ICCEM), Singapore, March 25–27, 2020.

Special Session Organizer, International Conference on Electromagnetics in Advanced Applications (ICEAA), Granada, Spain, September 9–13, 2019.

Special Session Organizer and Chair, IEEE International Symposium on Antennas and Propagation and USNC-URSI Radio Science Meeting, Atlanta, GA, USA, July 7–12, 2019.

Member of Organizing Committee, Short Course/Tutorial Chair, IEEE MTT-S International Conference on Numerical Electromagnetic and Multiphysics Modeling and Optimization (NEMO 2019), Cambridge, MA, USA, May 29–31, 2019.

Special Session Organizer and Chair, 2019 International Applied Computational Electromagnetics Society (ACES) Symposium, Miami, FL, USA, April 14–18, 2019.

Session Chair, IEEE International Symposium on Antennas and Propagation and USNC-URSI Radio Science Meeting, Boston, MA, USA, July 2018.

Member of Technical Program Committee, International Applied Computational Electromagnetics Society (ACES) Symposium, Beijing, China, July 2018.

Session Organizer and Chair, IEEE International Conference on Computational Electromagnetics (ICCEM), Chengdu, China, March 2018.

Session Chair, IEEE International Symposium on Antennas and Propagation and USNC-URSI Radio Science Meeting, San Diego, CA, USA, July 2017.

Member of Scientific Committee, 13th International Workshop on Finite Elements for Microwave Engineering, Florence, Italy, May 2016.

Member of Scientific Committee and Session Chair, 12th International Workshop on Finite Elements for Microwave Engineering, Chengdu, China, May 2014.

Howard University Research Symposium April 11, 2019

Invited Talks

1. Computational Electromagnetics Research: An Overview and Case Studies, NSF-sponsored workshop, Online Summer Research Experiences on Nanoparticles, Summer, 2020, 2021
2. Computational Electromagnetics Research: A Brief Overview, Howard University Research Retreat Symposium, April 9, 2019

3. All-Frequency Stable Finite-Element Formulation and Application in Electromagnetic Multiscale Problems, Howard University Research Symposium, April 11, 2019
4. Computational Modeling and Simulation of Electromagnetic and Multiphysics Problems: Challenges and Opportunities, Department of Electrical Engineering and Computer Science, Howard University, April 5, 2018
5. Computational Modeling and Simulation Methods for Electromagnetic and Multiphysics Problems, Resonant Inc., Santa Barbara, CA, March 20, 2018
6. Computational Modeling and Simulation Methods for Electromagnetic and Multiphysics Problems, School of Engineering and Technology, Central Michigan University, March 16, 2018
7. Computational Modeling and Simulation of Electromagnetic and Multiphysics Problems: Challenges and Opportunities, Department of Electrical and Computer Engineering, University of Wisconsin–Madison, August 15, 2017
8. Computational Modeling and Simulation of Electromagnetic and Multiphysics Problems: Challenges and Opportunities, Department of Electrical and Computer Engineering, Stony Brook University, May 11, 2017
9. CEM Challenges in Multiphysics Modeling and Simulation, IEEE International Symposium on Antennas and Propagation, Fajardo, Puerto Rico, June 30, 2016
10. Calderón Technique Based Integral Equation Methods in Computational Electromagnetics, Department of Electrical and Computer Engineering, University of Illinois at Urbana-Champaign, August 30, 2011

Graduate Students

Ph.D. Dissertations

1. Kamrun Nahar, "Combined Artificial Neural Network and Stochastic Learning Automata Architecture for Enhanced Machine Learning," Ph.D. Dissertation, Howard University, Nov. 2021.
2. Christian O. Díaz-Cáez, "Fast and Efficient Electromagnetic Simulation of Electrically Extra-Large Problems Using Phase Information and Mesh Automation," Howard University, Ph.D. Proposal, Mar. 2022; Ph.D. Dissertation, Nov. 2022.
3. Ayobami O. Idubor, "Hysteresis Model Parameter Extraction and Electromagnetic Detection of Buried Objects," Howard University, Ph.D. Proposal, May 2022; Ph.D. Dissertation, Nov. 2022.

M.Eng. Theses

1. Minyechil Mekonnen, "Finite Element Modeling and Simulation of Electromagnetic Scattering Problems," M.Eng. Thesis, Howard University, Dec. 2021.

Graduate Student Committee Member

1. Alali Abdulaziz, "Combating Severe Path Loss and Enhancing Physical Layer Security in sub-THz band for UAV Communications," Ph.D. Proposal, Advisor: Dr. Danda Rawat, Howard University, 2022.
2. Salomon Sathe, "Performance of Terahertz Communications for Vehicular Networks," Ph.D. Proposal, Advisor: Dr. Danda Rawat, Howard University, 2022.
3. Amber Wingfield, "Parameter Characterization for the Fabrication of a Diamond Light Emitting Diode," Ph.D. Dissertation, Advisor: Dr. Charles Kim, Howard University, 2022.

4. Khaled Alnifie, "Investigation of the Human's Weaknesses in Organizational Cyber Security: A Meta-Analytic Approach Through Literature Review," Ph.D. Proposal, Advisor: Dr. Charles Kim, Howard University, 2022.
5. Madiha Gul, "Detection of Compromised Component in a Computing System," Ph.D. Dissertation, Advisor: Dr. Charles Kim, Howard University, 2018.
6. Ikemefuna Uba, "Towards real-time dynamic tracking of reliability of circuit-active GaN FET," Ph.D. Proposal, Advisor: Dr. Charles Kim, Howard University, 2018.

Publications

1 edited book, 3 book chapters, 2 editorials, 37 journal articles, 59 full conference papers, 20 conference abstracts.

Citations: 1074, h-index: 20, i10-index: 32. (as of December 2022, based on Google Scholar)

Conference Abstracts

1. C. Díaz-Cáez and **Su Yan**, "An automatic mesh refinement method based on phase extracted basis functions for electromagnetic scattering analysis of electrically extra-large objects (Invited Paper)," in *Proc. ICEAA-IEEE APWC 2022*, Cape Town, South Africa, Sept. 2022.
2. **Su Yan**, "A continuous-discontinuous Galerkin method for the modeling and simulation of electromagnetic multiscale problems," in *Proc. ICEAA-IEEE APWC 2021*, Honolulu, Hawaii, USA, Aug. 2021.
3. J.-M. Jin, J. Qian, and **Su Yan**, "A dynamically adaptive DGTD for multiphysics and multiscale modeling," in *URSI GASS 2020*, Rome, Italy, Aug. 2020.
4. **Su Yan**, J. Qian, and J.-M. Jin, "An adaptive discontinuous Galerkin time-domain method for multiphysics and multiscale simulations," in *Proc. ICEAA-IEEE APWC 2019*, Granada, Spain, Sept. 2019.
5. **Su Yan**, "A resonant-free integral formulation for EM scattering from electrically large high-Q cavities," in *Proc. IEEE Antennas Propag. Symp.*, Atlanta, GA, USA, July 2019.
6. J. Qian, **Su Yan**, and J.-M. Jin, "A DGTD algorithm with dynamic h -adaptation and multirate time integration techniques for EM-plasma interaction simulations," in *Proc. IEEE Antennas Propag. Symp.*, Atlanta, GA, USA, July 2019.

7. **Su Yan**, "All-frequency stable finite-element formulation and application in electromagnetic multi-scale problems," in *2019 IEEE MTT-S International Conference on Numerical Electromagnetic and Multi-physics Modeling and Optimization*, Cambridge, MA, USA, May 2019.
8. J. Guan, **Su Yan**, K. Zhang, and J.-M. Jin, "A multi-solver algorithm for electromagnetic modeling of complex objects," in *Proc. URSI General Assembly and Scientific Symposium*, Montreal, Canada, Aug. 2017.
9. **Su Yan** and J.-M. Jin, "Coupled discontinuous Galerkin time-domain simulation of the nonlinear electromagnetic-plasma interaction," in *The 13th International Workshop on Finite Elements for Microwave Engineering (FEM2016)*, Florence, Italy, May 2016.
10. **Su Yan** and J.-M. Jin, "A hybrid finite element-discontinuous Galerkin solver for analyzing electromagnetics-plasma interaction in four dimensions," in *Proc. IEEE Antennas Propag. Symp.*, Vancouver, BC, Canada, July 2015.
11. J. Guan, **Su Yan**, and J.-M. Jin, "A GPU-accelerated integral-equation solution for large-scale electromagnetic problems," in *Proc. IEEE Antennas Propag. Symp.*, Memphis, TN, July 2014.
12. **Su Yan** and J.-M. Jin, "Ferromagnetic hysteresis analysis using time-domain finite element method in three dimensions," in *The 12th International Workshop on Finite Elements for Microwave Engineering (FEM2014)*, Chengdu, China, May 2014.
13. **Su Yan** and J.-M. Jin, "Nonlinear magnetic analysis using time-domain finite element method with a nonuniform time stepping," in *The 12th International Workshop on Finite Elements for Microwave Engineering (FEM2014)*, Chengdu, China, May 2014.
14. J. Guan, **Su Yan**, and J.-M. Jin, "A GPU-accelerated FE-BI-MLFMA for electromagnetic scattering simulation," in *The 12th International Workshop on Finite Elements for Microwave Engineering (FEM2014)*, Chengdu, China, May 2014.
15. **Su Yan** and J.-M. Jin, "Analysis of nonlinear electromagnetic problems using time-domain finite element method," in *Proc. IEEE Antennas Propag. Symp.*, Orlando, FL, July 2013.
16. J. Guan, **Su Yan**, and J.-M. Jin, "A CUDA implementation of the finite element-boundary integral method for electromagnetic scattering simulation," in *Proc. IEEE Antennas Propag. Symp.*, Orlando, FL, July 2013.
17. J. Guan, **Su Yan**, and J.-M. Jin, "OpenMP-CUDA implementations of the moment method and multilevel fast multipole algorithm on multi-GPU computing systems," in *Proc. IEEE Antennas Propag. Symp.*, Chicago, IL, July 2012.
18. **Su Yan**, J.-M. Jin, and Z. Nie, "A higher-order Calderón preconditioner for the electric-field integral equation using the Nyström scheme," in *Proc. IEEE Antennas Propag. Symp.*, Spokane, WA, July 2011.
19. **Su Yan**, J.-M. Jin, and Z. Nie, "Analysis of low-frequency electromagnetic problems using the EFIE with a Calderón multiplicative preconditioner and loop-star decomposition," in *Proc. IEEE Antennas Propag. Symp.*, North Charleston, SC, June 2009.
20. W. C. Chew, C. P. Davis, K. F. Warnick, Z. P. Nie, J. Hu, **Su Yan**, and L. Gürel, "EFIE and MFIE, why the difference?" in *Proc. IEEE Antennas Propag. Symp.*, San Diego, California, USA, July 2008.

Howard University Research Symposium

1. Christian Díaz and **Su Yan**, "A Pattern-Recognition-Based Mesh Refinement Method for the Moment Method Analysis of Electromagnetic Scattering Problems," in *Howard University Research Week*, Washington, DC, USA, Apr. 2022.
