

Mika Kato, Ph.D., is an associate professor of economics at Howard University whose research focuses on industrial dynamics, resource and environmental economics, and issues of economic growth and inequality. She joined the Howard University faculty in 2004 as an assistant professor and was promoted to associate professor in 2010. Kato earned her Ph.D. in economics from the New School for Social Research in New York, after completing a master's degree in economics and a bachelor's degree in public economics at Chuo University in Tokyo.

Kato's scholarship examines economic dynamics, market structure and the policy implications of economic and environmental change. Her research has been published in journals including *Industrial and Corporate Change*, *Journal of Competition Law and Economics*, *Research in International Business and Finance*, and *Review of Political Economy*, as well as in edited academic volumes on environmental and macroeconomic policy. Her work also explores emerging topics such as financial inclusion and cryptocurrency usage in the United States.

In addition to her research, Kato teaches a range of graduate and undergraduate courses in macroeconomic theory, growth and development, monetary economics and econometrics. She has advised numerous doctoral students in the Department of Economics and has served in key administrative and academic service roles at Howard University, including program coordinator for the Sasakawa Young Leaders Fellowship Fund and chair of several departmental committees. Through her teaching, research and service, Kato contributes to advancing scholarship and training the next generation of economists.
