

Ebony Evans, Pharm.D. is a clinical assistant professor in the Department of Clinical and Administrative Pharmacy Sciences at the Howard University College of Pharmacy, where she contributes to the education and training of future pharmacists through teaching, clinical practice and research. Her work focuses on patient-centered care and ambulatory pharmacy practice, with an emphasis on improving health outcomes and advancing disease prevention and management strategies.

Evans is an active clinician and scholar whose work bridges academic pharmacy and real-world patient care. She has contributed to research on health literacy and chronic disease management, including studies examining patient outcomes and access to care. In addition to her scholarly work, she has presented on topics such as the pharmacist's role in disease prevention and health maintenance, reflecting her commitment to public health and community engagement.
